

Journal of Flow Visualization and Image Processing

Volume 9, 2002

No. 1

- 1 Analysis of Symmetric Multiwavelets and Its Application for Image Compression **Chen Jiazhong, Zhou Jingli, Yu Shengsheng, He Xiaocheng, and Li Jun**
- 11 Visualization of the Effect of Dispersed Particles on Heat Transfer from an Impinging Jet **J. Réveillon and K. Cannevière**
- 25 A New Algorithm for Analyzing Shadowgraph Images **G. B. Brassington, J. C. Patterson, and M. Lee**
- 53 Unusual Laser-Sheet Tomography Coupled with Backlight Imaging Configurations to Study the Diesel Jet Structure at the Nozzle Outlet for High Injection Pressures **J. Yon, J.-B. Blaisot, and M. Ledoux**
- 75 A Mass Conservative Streamline Tracking Method for Two Dimensional CFD Velocity Fields **Zhenquan Li**
- 89 Coherent Structure Dynamics In Turbulent Channel Flow **Giancarlo Alfonsi and Leonardo Primavera**

Nos. 2 & 3

- 99 The Effect of Air-Suction Momentum Flux on Turbulent Jet Diffusion Flame Blowout Limit Extension in the Interim of Annular Counterflow Application **Sze Man Simon Chan, S. Torii, T. Yano, and T. Sameshima**

- 115 Optical Analogue Image Processing of Shapes and/or Sizes
of Particles Distributed Three-Dimensionally **I. Shimizu and F. Kato**
- 123 Flow-Visualization of a Two Side-by-Side Cylinder Wake **Z. J. Wang,
Y. Zhou, and H. Li**
- 139 Flow Visualization Behind Three Cylinders of Equal and Unequal
Spacing **X. W. Wang, H. J. Zhang Y. Zhou, and J. Y. Tu**
- 153 Experimental Characterization of the Flow Within a Transitional
Rectangular Cavity **P. Reulet, M. J. Estève, P. Millan,
and M. L. Riethmuller**
- 171 2D Thickness and Temperature Mapping of Fluids by Means
of a Two-Dye Laser Induced Fluorescence Ratiometric Scheme
Carlos H. Hidrovo and Douglas P. Hart
- 193 Reverse Flow Phenomenon in a Rotating Diffuser **Brane Širok,
Tom Bajcar, and Matevz Dular**
- 211 Effects of Gaps between the Side-Walls and Ribs on the Rib-Induced
Flow Structure and Heat Transfer Distribution Inside a High Aspect
Ratio Cooling Channel **R. Kiml, S. Mochizuki, and A. Murata**
- 229 Transient Thermal Mixing Performance and Flow Pattern in a Room
with Through-flow **S. Inada, W.-J. Yang, H. Kaneko, and I. Nagase**
- 247 Visualization of the Microbubble Generated in the Droplet Impinging on
the Heated Quartz Surface **Shigeaki Inada, Youhei Kawahara, and
Wen-Jei Yang**
- 257 Experimental Study on the Breakup Mechanism of a Thin Liquid Sheet
from an Air-Assisted Planar Nozzle **Jae W. Park, Kang Y. Huh,
Xianguo Li, and Metin Renksizbulut**

No. 4

- 271 Image Correlation of Particle Distribution by Discrete Wavelet
Transform of Capacitance CT Images **Masahiro Takei, Mitsuaki
Ochi, Hui Li, Yoshifuru Saito, and Kiyoshi Horii**
- 281 Thermal Fluid Transport Phenomena over Slot-perforated Flat Surface
in Channels **Shuichi Torii and Wen-Jei Yang**

297	Smoke-Wire Visualization and Hot-Wire Measurement of an Acoustically Excited Impinging Plane Jet with a Small Cylinder Fei-Bin Hsiao, I-che Hsu, and Jiann-Min Huang
317	Time-Domain Visualization of Quasi-3D Current Vector Distributions D. Sekijima, S. Hayano, and Y. Saito
325	The Fourier–Wavelet Transform Method of Extraction of Facial Expression Chieko Kato, Yoshifuru Saito, Yoichi Hayashi, and Kiyoshi Horii
333	Circular Wall Jet Issuing Along a Cylinder (Wavelet Analysis and Flow Visualization) M. Nakashima, T. Tabata H. Li, and T. Nozaki
