

Journal of Environmental Pathology, Toxicology, and Oncology

Index to Subjects

**Volume 27, 2008: Issue 1, 1–75; Issue 2, 77–155; Issue 3, 157–243;
Issue 4, 245–340**

- 13-cis-retinoic acid, 197
5-aminosalicylic acid, 123
- acute infectious purpura fulminans, 191
adenocarcinoma, 267
adjuvant therapy, 23
adverse events, 147
allergy to mercury, 147
amalgam restoration, 1
aminolevulinic acid, 5
angiosarcoma, 35
anti-angiogenesis, 23
antifertility, 287
antiglomerular basement membrane, 147
antioxidants, 113, 233
antioxidative effects, 89
antithrombin III, 191
antitumor promotion, 321
apoptosis, 197, 209, 219
arsenic, 43
arsenite, 43
assisted reproductive technologies, 245
Azadirachta indica, 219
- Barrett's esophagus, 5
Bcl-2, 209
benzo(a)pyrene, 219, 267
benzoporphyrin, 5
bioinformatics, 157
BRCA1, 245
BRCA2, 245
breast cancer, 61
- cancer therapy, 181
cancer, 23
carcinogenesis, 43, 77, 321
carcinogens, 233
caspases, 209
cervical intraepithelial neoplasia, 307
chemical modifications, 23
chemoprevention, 321, 233
- chromosomal aberrations, 53
chrysotile asbestos, 267
colon cancer, 89
colorectal cancer, 257
complex, 123
computational biology, 157
cosmic radiation, 277
Cr(VI), 77
Crohn's colitis, 257
Cu-5ASA, 123
Cynodon dactylon, 101
cytokines, 197
- data mining, 157
demographic characteristics, 61
dimethylhydrazine 89
DMBA, 209
DNA fragmentation, 219
doxorubicin encapsulation, 181
drug dose, 35
- Ehrlich's ascites carcinoma, 123
electron microscopy, 219
ERK, 135
esophageal cancer, 5
ethanol injection method, 181
etoricoxib, 295
- factors affecting size, 181
FAK, 135
fetus, 303
fibronectin, 135
fibrosis, 267
flight personnel, 277
fluence rate, 35
Food and Drug Administration (FDA), 303
forestomach tumors, 219
formulations, 23
free radicals, 101
frequency, 257
- gamma radiation, 123
genome regulation, 157
- Grewia asiatica*, 113
gynecology, 307
- histochemistry, 219
hypericin, 23
- idiopathic purpura fulminans, 191
immune response, 35
Indian grapes, 321
informed consent, 1
inositol hexaphosphate (IP6), 209
integrin $\alpha 5\beta 1$, 135
- K6/ODC transgenic mice, 43
kidney autoimmunity, 147
- lead-based paints, 53
legislations, 1
light dose, 35
light dosimetry, 23
lipid peroxidation, 113, 219
liposomes, 181
low methionine diet, 43
low protein diet, 43
lymphocytes, 53
- magnetic resonance imaging, 245
male mice, 287
melanoma, 197
membrane fluidity, 295
mercury amalgam fillings, 147
mercury fillings, 303
mercury toxicity, 147
mercury, 1
mercury-induced autoimmune glomerulonephritis, 147
mercury-induced kidney autoimmune disease, 147
microarray analysis, 157
micronuclei, 101, 123
MMA(III), 43
MMP-2, 135
MMP-9, 135
molecular breast imaging, 245

- monomethylarsonous acid, 43
 motoxafin lutetium, 5
 mt p53, 209
 MT1-MMP, 135
 mutagen sensitivity, 277

 neonatal purpura fulminans, 191
 neurotoxicity, 303
 NF- κ B, 197
 nonsteroidal anti-inflammatory drugs, 89, 295

 occupational painters, 53
 ornithine decarboxylase, 43
 oxidative stress, 77
 oxygen, 23

 phase II detoxifying enzymes, 233
 pheophorbides, 5
 photodynamic diagnosis, 23, 307
 photodynamic therapy, 23, 35, 307

 phthalocyanine, 5
 polyphenols, 321
 porfimer sodium, 5
 pregnant women, 303
 prophylactic mastectomy, 245
 prophylactic oophorectomy, 245
 Protein C, 191
 Protein S, 191
 pyrimethamine, 287

 radiation protection, 101
 radioprotection, 113
 rat colonic brush border membrane, 295
 reduced glutathione, 113
 renotoxicity, 147
 reproductive characteristics, 61

 SCOL, 181
 signal transduction, 77
 sister chromatid exchanges, 277

 skin papillomas, 233
 skin, 209
 specific nephrotoxicants, 147
 sperm shape abnormality, 287
 spermatogenesis, 287
 spleen colonies, 123
 State of Kuwait, 61
 streptonigrin, 277
 survival, 123

 talaporfin, 5
 temoporfin, 5
Tinospora cordifolia, 233
 tissue arsenic concentrations, 43
 transcription factors, 197
 transgenic mice, 267
 treatment regimes, 35

 vulvar intraepithelial neoplasia, 307

 Zn-5ASA, 123
