

## HEAT TRANSFER RESEARCH

---

**Volume 38**

---

**Volume 38 Number 1, 2007**

- 1 Numerical Investigation of Temperature-Dependent Viscosity Variation Effects on Thermally Developing Forced Convection through a Porous Medium  
*K. Hooman and S. R. Mohebpour*
- 9 Modeling the Process of Afterburning in Supersonic Jets  
*K. B. Galitseiskii*
- 21 Modeling of Energy Transfer during Combustion of Low-Gas Thermal Compositions in Systems with Intensive Heat Removal  
*R. Sh. Enaleev, I. A. Abdullin, R. R. Dimukhametov, and V. A. Kachalkin*
- 33 Modeling of Filtration Combustion in a Porous Medium with Spatially Nonhomogeneous Characteristics  
*K. V. Dobrego, I. A. Koznacheev, and I. M. Kozlov*
- 45 Stabilization of Combustion of a Lean Mixture by a Coaxial Twisting Flow  
*V. I. Kaufman, A. I. Mayorova, and V. I. Yagodkin*
- 57 Critical Phenomena and Structural Effects in Combustion of Disordered Heterogeneous Mixtures  
*P. S. Grinchuk and O. S. Rabinovich*
- 71 Numerical Modeling of Heat and Mass Transfer Processes in PECVD Reactors for Growing Silicon Films under the Conditions of Intense Formation of Higher Silanes in the Gas Phase  
*Yu. E. Gorbachev, M. A. Zatevakhin, A. A. Ignatiev, and V. V. Krzhizhanovskaya*
- 85 The Mechanism of Mass Transfer in Combustion of the Mo-B System  
*Kh. V. Manukyan, A. V. Egishyan, A. B. Arutyunyan, and S. L. Kharatyan*

**Volume 38 Number 2, 2007**

- 95 Effect of the Microstructure of Heterogeneous Mixture on Regularities of Gas-Free Combustion  
*N. A. Kochetov, A. S. Rogachev, A. N. Emelianov, E. V. Illarionova, and V. M. Shkiro*
- 107 Modeling Heat-Erosion Destruction of HAC Elements during Flight in a Dusty Atmosphere  
*D. S. Mikhatulin and D. L. Reviznikov*
- 123 Convective Heat Transfer in the Processes of "Gas-Free Combustion (by an Example of Ti + C System Combustion)  
*B. S. Seplyarskii and S. G. Vadchenko*
- 135 Methods for Calculating the Process of Chemisorption in Systems with a Moving Front of an Instantaneous Irreversible Reaction  
*L. M. Musabekova and A. M. Brener*
- 143 Ratio of the Thermal and Erosion Components in Heat-Erosion Destruction of Materials in a Supersonic Heterogeneous Flow  
*D. S. Mikhatulin and Yu. V. Polezhaev*
- 163 Microheterogeneous Model of Gas-Free Combustion  
*A. S. Rogachev and N. A. Kochetov*
- 171 Analytical Method for Calculating Time Characteristics of Ignition of Hybrid Gas Suspensions by a Hot Body  
*B. S. Seplyarskii, S. V. Kostin, and T. P. Ivleva*
- 185 Nature of an Abnormal Dependence of the Rate of "Gas-Free" System Combustion on the Diameter  
*B. S. Seplyarskii*

**Volume 38 Number 3, 2007**

- 197 On Applicability of the Kinetics of Diffusion-Controlled Interaction to SHS Modeling  
*B. B. Khina and B. Formanek*
- 211 Kinetics of Boiling-up of a Gassed Liquid  
*V. G. Baidakov, A. M. Kaverin, and G. Sh. Boltachev*
- 223 Study of the Shape of Vapor Formations in Explosive Boiling  
*B. P. Avksentyuk, V. M. Kravchenko, V. V. Ovchinnikov, and V. Ya. Plotnikov*
- 233 Heat and Mass Transfer in Facilities with a Moving Piston  
*S. N. Kharlamov*

- 245 Miniature Heat Pipes for Thermal Control of Radio-Electronic Equipment  
*L. L. Vasiliev, A. G. Kulakov, L. L. Vasiliev, Jr., M. I. Rabetski,*  
and *A. A. Antukh*
- 259 Special Features of Boiling of Emulsions with a Low-Boiling  
Dispersed Phase  
*N. V. Bulanov and B. M. Gasanov*
- 275 New Activated-Carbon Materials for Systems of Storing Natural Gas in  
an Absorbed State  
*L. L. Vasiliev, D. A. Mishkinis, A. G. Kulakov, N. K. Luneva,*  
*A. M. Safonova, Yu. V. Ginzburg, and S. Rozin*

**Volume 38 Number 4, 2007**

- 291 Detonation Wave Generated by a Hypervelocity Projectile  
*M.-O. Sturtzer, K. Togami, S. Yamashita, and K. Takayama*
- 299 Mathematical Model of Combustion in Particulate 2-Phase  
*Aleksandar Saljnikov, Simeon Oka, and Žarko Stevanović*
- 313 Modeling of Nucleate Boiling Heat Transfer in a Film Formed  
by an Impinging Jet  
*Jaroslav Mikielewicz, Dariusz Mikielewicz, and Danuta Barnik*
- 325 Thermal Explosion in a Flammable Gas Containing Fuel Droplets:  
Asymptotic Analysis  
*Igor Goldfarb, Sergei Sazhin, and Ann Zinoviev*
- 339 Heat and Mass Transfer During Gas Absorption  
with Simultaneous Second-Order Chemical Reaction  
*R. Pohorecki, E. Molga, and W. Moniuk*
- 351 Influence of the Wetted Surface Curvature  
on the Laminar Liquid Film Thickness  
*S. Sinkunas, J. Gylys, A. Kiela, and I. Gimbutyte*
- 361 Application of Homotopy-Perturbation Method for Systems of Nonlinear  
Momentum and Heat Transfer Equations  
*D. D. Ganji, M. Rafei, and J. Vaseghi*
- 381 Experimental Investigation of a Pulsating Capillary Heat Pipe  
*S. V. Konev and V. A. Olekhovich*

**Volume 38 Number 5, 2007**

- 389 Rate of Bubble Growth at Limiting Superheats  
of a Stretched Liquid  
*V. E. Vinogradov and P. A. Pavlov*

- 399  $1/f$  Fluctuations in Boiling Crisis  
A. V. Vinogradov, A. V. Reshetnikov, V. N. Skokov, and V. P. Koverda
- 407 Analytical Treatment of Fins with Temperature-Dependent Surface Heat Flux Using the Homotopy Perturbation Method and Comparison of Decomposition and Numerical Methods  
D. D. Ganji, M. Mostofi, A. Delavar, and A. Kazemi
- 417 A Mathematical Model and Some Results of Calculation of Two-Phase Turbulent Jets with Phase Transitions  
B. M. Galitseiskii and V. Yu. Zueva
- 431 Summary of the Experimental Data on Heat Transfer in Condensation of Moving Vapor Inside Vertical Tubes  
I. I. Gogonin
- 449 Study of Special Features of Development and Collapse of Vapor Film on Hemispherical Surfaces  
V. S. Grigoriev, V. G. Zhilin, Yu. A. Zeigarnik, Yu. P. Ivochkin, and K. G. Kubrikov
- 461 Hydrodynamic Structure of a Two-Phase Bubble Flow in a Horizontal Channel  
O. N. Kashinskii and E. V. Kaipova
- 473 Evolution of Local Characteristics of an Ascending Slug Flow in a Vertical Pipe  
O. N. Kashinskii, V. V. Randin, and A. S. Kurdyumov

**Volume 38 Number 6, 2007**

- 483 Heat Transfer in Boiling and Ascending Flow Modes in Vertical Rectangular Small-Size Channels  
V. V. Kuznetsov, A. S. Shamirzaev, and I. N. Ershov
- 495 Computational Study of Nonstationary Modes of Operation of a Solar Sodium Evaporator with Supply of a Nonuniform Heat Flux  
O. E. Maletskaya, N. M. Fialko, E. N. Shevchuk, and V. L. Yurchuk
- 507 On Modeling Heat and Mass Transfer for Vapor Absorption by a Stationary Layer of the Solution with and without Surfactants  
V. E. Nakoryakov and N. I. Grigorieva
- 519 Mixed Heat Transfer in a Subcooled Twisted Flow  
A. T. Komov, A. N. Varava, A. V. Dedov, and V. V. Yagov
- 533 Experimental Investigations of Heat Transfer in a Subcooled Twisted Flow  
A. T. Komov, A. N. Varava, A. V. Dedov, and R. I. Kamenskov-Nemynov

- 541 Heat and Mass Transfer in Processes of Condensation Relaxation of Supersaturated Vapor  
*N. M. Kortsenshtein and E. V. Samuilov*
- 553 Experimental Studies of Heat-Transfer Characteristics of Miniaturized Heat Pipes  
*V. Yu. Kravets, Yu. E. Nikolaenko, and Ya. V. Nekrashevich*
- 565 On the Paradox about the Propagation of Thermal Energy Speed in a Semi-Infinite Body Heated by a Forced Convective Flow  
*Antonio Campo and Salah Chikh*

**Volume 38 Number 7, 2007**

- 573 Heat Transfer in Condensation of Vapors of Binary Mixtures of Partially Soluble Liquids  
*O. A. Lonshchakov and V. G. Dyakonov*
- 587 Study of Critical Choking of the Flow with Discharge of Boiling-up Liquid in Short Channels  
*G. K. Ivanitskii*
- 601 Modeling of Miniaturized Two-Phase Thermal-Control Systems  
*B. V. Kosoi and D. N. Nikitin*
- 613 Setting of Nonstationary Boundary Conditions in the Front with Changes of Boiling Modes  
*A. N. Pavlenko and I. P. Starodubtseva*
- 621 Study of the Dynamics of Flow and Heat Transfer in Draining Intensely Evaporated Wave Films of Liquid  
*A. N. Pavlenko, A. M. Matsekh, and A. V. Morozov*
- 635 Modeling of Near-Wall Explosive Boiling-up  
*S. M. Mitrofanov and P. A. Pavlov*
- 647 Development and Investigation of Sorption Heat Pumps  
*L. L. Vasiliev and L. E. Kanonchik*
- 661 Phase Transitions in a Liquid Flow  
*V. G. Tonkonog and Yu. F. Gortyshov*

**Volume 38 Number 8, 2007**

- 669 Special Features of Transfer Processes in an Evaporating Droplet Depending on the Method of Heating  
*G. U. Miliauskas, R. V. Montvilas, R. P. Bankauskas, and Yu. B. Gudzinskas*
- 683 Special Features of Heat and Mass Transfer During Growth of a Vapor Film in a Porous Shell Filled with Helium II

*A. P. Kryukov and Yu. Yu. Selyaninova*

- 695 Nonstationary Heating and Phase Transitions in a Live Cell in Absorption of Laser Radiation  
*D. O. Lapotko, A. I. Shnip, O. G. Martynenko, E. Yu. Lukyanova, and O. V. Klimovich*
- 709 Nonstationary Crisis of Boiling of Liquids  
*V. I. Deev, K. V. Kutsenko, A. A. Lavrukhin, and V. S. Kharitonov*
- 721 Low-Frequency High-Energy Pulsations in the Processes of Heat and Mass Transfer  
*V. P. Koverda and V. N. Skokov*
- 731 Author Index, Vol. 38
- 735 Tables of Contents, Vol. 38
