

## SUBJECT INDEX – Volume 1

*Heat Pipe Science and Technology: An International Journal*

### Page Numbers for Issues:

**Issue 1**, 1-112; **Issue 2**, 113-204; **Issue 3**, 205-302; **Issue 4**, 303-397

aircrafts, 251  
fins, 279  
heat flux, 151  
heat transfer, 219  
loop heat pipes, 19, 129, 251  
aluminum heat pipe, 313  
artificial permafrost storage, 183  
axial groove, 313  
boiling, 163, 205  
capillary evaporators, 129  
capillary forces, 359  
capillary structure, 47,313,375  
carbon fiber, 113  
CFRP, 261  
closed thermosyphon, 303  
condenser, 151  
confined bubble nucleation, 163  
confined spaces, 219  
cooling system, 387  
copper oxide, 303  
copper–water loop heat pipe (LHP), 151  
CTE, 113  
data center, 183  
deployable radiator (DR), 1  
EcosimPro, 19  
effectiveness, 279  
electronic box, 251  
electronic device, 205  
electronics cooling, 59  
energy conservation, 71  
energy efficiency, 71  
evaporation, 59, 99, 219  
evaporator, 47, 151  
flexible section, 1  
fluid performances, 99  
freezing index, 183  
geothermal extraction, 183  
glacier, 183  
global warming, 183  
heat pipe, 71, 99, 113, 183, 219, 261  
heat recovery, 71  
heat sink, 205  
heat switch, 19  
heat transfer coefficient, 151  
heat transfer limit, 237  
heat transfer, 375  
hermetic compressor, 387  
honeycomb panel, 313  
iceberg, 183  
industrial usage, 71  
inverted meniscus, 375  
loop heat pipe (LHP), 1,329,359,375  
loop thermosyphon, 47,387  
Mars Rover, 19  
meniscus, 99  
microregion, 99  
miniature heat pipe, 59  
nanofluid, 303  
noninverted meniscus, 375  
orientation, 303  
passive cooling system, 251  
passive two-phase heat exchangers, 279  
passive variable thermal-conductance device, 19  
PCM, 183  
permafrost, 89  
phase change, 163  
photovoltaic, 183  
pore-network model, 129  
porous body, 219  
porous media, 59  
porous wick, 129  
pressure drop, 237  
pressure regulating valve, 19, 329  
pulsating heat pipe, 279  
radiation cooling, 183  
radiator, 261  
seasonal cooling devices, 89  
secondary wick, 19  
simulation, 313  
soil base, 89  
space vehicle, 313

spacecraft thermal control, 329  
spacecraft, 113  
temperature field, 313  
thermosyphons, 89  
thermal control, 19  
thermal key, 1  
thermal performance of TPCT, 303  
thermal radiator, 113

thermal resistance, 47, 151  
thermosyphon, 71, 183, 205  
two-phase flow, 219, 237  
two-phase loop thermosyphon, 163, 237  
two-phase technology, 1  
two-way regulation mode, 329  
waste heat recovery, 359  
water-cooled, 205
