

JOURNAL OF AUTOMATION AND INFORMATION SCIENCES

Volume 42

Issue 1

2010

CONTENTS

- 1 Attainability Domains for Linear and Some Classes of Nonlinear Discrete Systems and Their Control**
V.M. Kuntsevich, A.B. Kurzhanski
- 19 Nonstochastic Approach to Determining the Dimension and Parameters of Linear Autoregressive Models by the Input and Output Variables Measurements**
I.A. Kremenetskiy, N.N. Salnikov
- 32 A Linear Quadratic Regulator Problem for Descriptor Lumped and Distributed Systems with Discrete Time**
M.F. Bondarenko, L.A. Vlasenko
- 42 Influence of Technological Process on Dynamics of Controlled Machine Aggregates**
V.A. Krasnoshapka, I.A. Varava
- 53 Mathematical Model for Nondeterminate Processes on the Basis of Set-Theoretic Interpretation of Uncertainty**
M.M. Lychak
- 68 On Control of Composite Wheeled Vehicle with Three Steering Wheels**
V.B. Larin
- 79 International Forum “Innovations and Highest Quality Technologies”**

CONTENTS

- 1 Identification of Parameters of Dynamical Problems of Theory of Elasticity for Compound Cylinder**
I.V. Sergienko, V.S. Deineka
- 31 Peculiarities and Interdependence of Identification and Control Problems under Uncertainty**
V.F. Gubarev, A.V. Gummel, A.O. Zhukov
- 44 Model-Based Analysis of Biological Tissue Heating by Point Ultrasound Sources**
S.I. Lyashko, D.A. Klyushin, V.V. Pavlychko
- 51 Designing the Simplest Fuzzy Controllers for Automatic Control Systems**
V.I. Gostev
- 67 One Approach to Solving Vector Problems with Fractionally Linear Functions of the Criteria on the Combinatorial Set of Arrangements**
N.V. Semenova, L.N. Kolechkina, A.N. Nagornaya

CONTENTS

1 Our Hero of the Anniversary

3 Identification of Thermostressed State of a Compound Hollow Sphere

I.V. Sergienko, V.S. Deineka

30 General Approach to Solving Optimization Problems in Distributed Computing Systems and Theory of Intelligence Systems Construction

S.V. Listrovoy, S.V. Minukhin

47 Necessary Optimality Conditions of Second Order in Classical Sense in Optimal Control Problems of Three-Point Conditions

M.F. Mekhtiyev, Sh.I. Djabrailov, Ya.A. Sharifov

58 Nonlinear Mathematical Model of Two-Level Transfer of the “Filtration–Consolidation” Type

M.R. Petryk, D.M. Mykhalyk

71 Estimation of Latitudinal Drift and Differential Rotation of Disbalance Flow of Magnetic Field on the Sun on the basis of Observations

Ya.I. Zyelyk, N.N. Stepanian, O.A. Andryeyeva

CONTENTS

- 1 On one Problem of Optimization of a Linear Fractional Function on Permutations**
G.A. Donets, L.N. Kolechkina
- 13 On the Parallel Proximal Decomposition Method for Solving the Problems of Convex Optimization**
V.V. Semenov
- 19 Operations on Fuzzy Numbers with Bearer of the Cardinality of Continuum for Modeling in Combinatorial Optimization**
O.A. Iemets, T.A. Parfonova
- 37 Calculation of Multiplication, Using Walsh Transform**
A.N. Tereshchenko, S.S. Melnikova, L.A. Hnativ, V.K. Zadiraka, N.V. Koshkina
- 66 A Model of Fusion of Information on Image Quality Based on the Dempster–Shafer Theory for Biometric Systems Interoperability**
Ya.N. Imamverdiyev
- 75 Application of Wiener Filtration of Additive Noise and Multiplicative Distortion for Space Images Restoration**
S.A. Mudragel, S.A. Smyrnov, M.S. Shcherbatska

CONTENTS

- 1 Approximate Solution of One Dynamic Problem of Geoinformatics**
V.M. Bulavatsky, V.V. Skopetsky
- 12 On Sufficient Solvability Conditions for One Class of Optimization Problems**
V.E. Kapustyan, O.P. Kogut
- 21 Combinatorial Cutting while Solving Optimization Nonlinear Conditional Problems of the Vertex Located Sets**
O.A. Yemets, Ye.M. Yemets, T.V. Chilikina
- 30 Optimal Quadrature Formulas for Computation of Continuous Wavelet Transforms of Functions in Certain Classes**
V.K. Zadiraka, S.S. Melnikova, L.V. Luts
- 45 Comparative Analysis of Recognition Methods of Inflammatory Processes at the Gliomas of Brain**
N.Ya. Gridina, A.M. Gupal, A.L. Tarasov
- 53 Determination of the Temperature Field in a Seam while Thermal Effects on the Basis of Solving the Inverse Problem**
Kh.M. Hamzayev
- 61 Medical Images Indexing and Retrieval in a Distributed Computing Environment**
K.S. Kurochka, I.V. Safonau
- 72 Modeling and Optimization of Modern Financial-Industrial Structures Functioning**
T.N. Boyko, F.G. Garashchenko

CONTENTS

- 1 Parameters Identification of Thermoelastic Problems for Compound Hollow Sphere under Nonstationary Temperature Field**
I.V. Sergienko, V.S. Deineka
- 30 Identifying Failures in Sensors of a Spacecraft Attitude Control System**
D.V. Lebedev
- 43 Absolute Interval Stability of Indirect Regulating Systems of Neutral Type**
A.V. Shatyrko, D.Ya. Khusainov
- 55 A Measure of Stability Against Singular Perturbations and Robust Properties of Linear Systems**
S.A. Dubovik, A.A. Kabanov
- 67 On Construction of Finite-Dimensional Mathematical Model of Convection–Diffusion Process with Usage of the Petrov–Galerkin Method**
N.N. Salnikov, S.V. Siryk, I.A. Tereshchenko

CONTENTS

- 1 Identification of Parameters of Dynamical Problems of Theory of Elasticity for Compound Hollow Sphere**
I.V. Sergienko, V.S. Deineka
- 30 ACO-H Metaheuristic Combinatorial Optimization Method**
L.F. Hulyanytskyi, S.I. Sirenko
- 43 On Relation between Sets of Solutions of the Main and Extended Problems for Control Problems in Elliptic Equations**
M.A. Yagubov, N.Sh. Asadova
- 54 Relay Control of Nonlinear System with Uncertain Values of Parameters**
K.R. Aida-zade, A.B. Rahimov
- 65 Fuzzy-system of Automatic Control of the Transmitter Power of the Adaptive Channel of Radio Communication**
V.I. Gostev
- 78 On the Control Problem for Solution of Stochastic Differential Equation with Additive Fractional Brownian Motion**
P.S. Knopov, E.N. Derieva

CONTENTS

- 1 The Problem of Optimal Control of the Thrust Value of a Real Electro Rocket Engine**
B.N. Kiforenko, I.Yu. Vasil'ev, Ya.V. Tkachenko
- 13 On Correcting the System of Inertial Navigation**
V.B. Larin, A.A. Tunik
- 27 Multicriteria Distribution of Limited Resources**
A.N. Voronin
- 36 Determination of the Secondary Structure of Membrane-associated Proteins in Case of Human Cytochrome**
V.O. Kitam, B.A. Beletskiy, A.M. Gupal, N.A. Chashchin
- 42 On Sufficiency of the Consistency Level of Group Ordinal Estimates**
V.V. Tsyganok, S.V. Kadenko
- 48 Renewal Type Queues with a Complex Arrival Process**
E.V. Koba, O.N. Dyshlyuk
- 55 Systems Analysis of Filtration Processes in Multiconnected Curvilinear Domains**
A.Ya. Bomba, V.V. Skopetsky, S.V. Yaroshchak
- 65 The Model of Nonlinear Filtration Optimal Control for the Problem of Areas Underflooding**
V.V. Akimenko, S.A. Mitrokhin

CONTENTS

- 1 Optimization of Transient Processes Characteristics of “Direct” Automatic Regulation Systems with the Poisson Perturbations**
A.Ya. Dovgun, E.V. Yasinskyy
- 15 Minimization of Variance for Multidimensional Processes with Multirate Sampling for Models in Space of States with Delay**
V.D. Romanenko, A.A. Reutov
- 25 Identification of Stationary Linear Systems by Irregular Measurements**
A.S. Apostolyuk, V.B. Larin
- 36 Analysis of the Problem of Parametric Identification of Nonlinear Automata over Finite Ring**
V.G. Skobelev
- 42 The Optimal Control Problem of Monocycle Biological Cells Aggregation**
V.V. Akimenko, Yu.V. Zagorodniy, V.V. Romanenko
- 53 Mathematical Modeling of Complex Social Economic Objects Based on Analogies with Physical Fractals**
Ya.I. Vyklyuk
- 68 On the Probability Estimate of the Insurance Company Bankruptcy in the Model with Stochastic Premiums and Claims and the Opportunity to Invest in Financial (B, S) -market**
A.V. Baev, B.V. Bondarev, T.V. Zhmykhova

CONTENTS

- 1 Robust Learning Wavelet Neural Networks**
O.G. Rudenko, A.A. Bezsonov
- 16 On an Unconventional Mathematical Model of Geoinformatics**
V.M. Bulavatsky, V.V. Skopetsky
- 26 Nonparametric Criterion of Equivalence of General Populations Based on Averaged Measure of Closeness Between Samplings**
E.N. Golubeva, D.A. Klyushin, Yu.I. Petunin
- 32 Guaranteed Estimate of the Features Utility while Statistical Recognition of Two Classes**
L.S. Fainzilberg
- 49 Topological Methods and Algorithms of Transform of the Contours and Regions of Flat Images**
O.N. Berezsky
- 60 Survey of Spectral Methods of Embedding of Watermarks into Audio Signals**
N.V. Koshkina
- 73 Cryptosteganographic Algorithm with Usage of Segmentation Methods**
I.V. Shvidchenko

CONTENTS

- 1 Parameters Identification by Gradient Methods of the Problems of Substance Diffusion in Nanoporous Medium**
I.V. Sergienko, V.S. Deineka
- 18 Accuracy of Estimation of Parameters of Linear Regression on Errors in Variables**
N.N. Salnikov
- 31 Reconstruction of the Initial State Vector of Nonlinear Automata over a Finite Ring**
V.G. Skobelev
- 36 Comparative Analysis of Estimation Methods of Vertices Correlation while Bayesian Networks Construction**
P.I. Bidyuk, V.I. Davidenko, D.V. Trofimenko, A.N. Terentyev
- 46 Compression of Text Image Based on Selection of Characters and Their Classification**
V.G. Ivanov, M.G. Lyubarskiy, Yu.V. Lomonosov
- 58 Bayesian Recognition Procedures on Networks**
A.A. Vagis
- 64 Magnetic Attitude Control and Stabilizing System of Egyptsat-1 Spacecraft**
N.V. Yefimenko
- 71 Method of Audio Signals Watermarking Based on the Wavelet and Fourier Transforms**
N.V. Koshkina

CONTENTS

1 On a Nonisothermal Consolidation Mathematical Model of Geoinformatics

V.M. Bulavatsky, V.V. Skopetsky

13 Modification of Fuzzy c-Means Method Using a Nonlinear Vector Criterion

A.F. Bulat, E.M. Kiseleva, S.A. Pichugov, O.B. Blyuss

22 Modeling Method of Discrete Dynamic Systems with Constant Structure

V.N. Spiridonov

32 Disaster Risk Assessment Based on Heterogeneous Geospatial Information

N.N. Kussul, B.V. Sokolov, Ya.I. Zyelyk, V.A. Zelentsov, S.V. Skakun, A.Yu. Shelestov

46 Modeling the Dynamic Generalized Ecological and Economic System of Interindustry Balance with a Delay

M.V. Boichuk, N.M. Shmurygina

69 Comparison of Two Strategies for Planning Perishables Transportation

V.G. Galushko

74 Contents
