

CLEAN AIR

**International Journal on Energy
for a Clean Environment**

Volume 7, 2006

Number 1

- 1 A CFD-Based Analysis of Low Volatile Coal Combustion
in Different Scale Burners**
D. Toporov and J. L. T. Azevedo
- 17 Influence of Burner Design on Formation of Pollutant Emissions
in Oil Combustion**
*A. Gallegos Muñoz, C. A. Romo Millares, M. Huerta Espino,
J. Espinoza Garza, and A. Mani González*
- 29 Technical Assessment of Diesel Fuel-Oleic Sunflower Methyl Ester
Blends Utilization in a Large Diesel Engine**
F. Neto Da Silva and J. Arriscado De Oliveira
- 43 Optimization of the Oxidizer Repartition in Order to Reduce
the NO Emissions in Municipal Waste Incineration**
T. Rogaume, J. Koulidiati, F. Richard, F. Jabouille, and J. L. Torero
- 59 Design Improvements in the Furnace of Khandsari (Cottage Sugar
Industry) for Air Pollution Prevention and Control**
Avinash Kumar Agarwal and Mukesh Sharma
- 77 Formation and Oxidation of Soot Particulates in a Diesel Fuel Spray
Flame**
R. J. Crookes and G. Sivalingam

Number 2

- 93 **Design Optimization for Low-NO_x Coal-Firing Systems**
E. Bar-Ziv, B. Chudnovsky, and A. Talanker
- 105 **Nitric Oxide Emission Modeling in a Bubbling Fluidized Bed Furnace for Biomass**
A. Saario, A. Oksanen, and M. Ylitalo
- 127 **Dilution Effects in Natural Gas Mild Combustion**
M. De Joannon, P. Sabia, A. Tregrossi, and A. Cavaliere
- 141 **Prediction of NO_x Formation in a Practical-Scale, Nonpremixed Turbulent Flame Using Eddy Dissipation and Radiative Flamelet Combustion Models**
S. K. Sangha, T. Mahmud, and C. Y. Ma
- 159 **The Catalytic Effect of Vanadium on the Reactivity of Petcoke with O₂ and NO**
S. Salvador, J.-M. Commandré, and B. R. Stanmore
- 175 **Comparison of Three Oxidizing Agents for Efficiency of Mercury Removal in a Packed-Bed Wet Scrubber from Infectious Waste Incinerator**
A. Changsuphan, S. Kerdsuwan, and V. N. Bashkin

Number 3

- 187 **Experimental Investigations of Counterflow Double Flames Applicable to an Industrial Natural Gas-Fired Burner**
L. P. Rangel, L. M. Fletcher, M. Pourkashanian, and A. Williams
- 203 **Development of a Low-NO_x Swirl Burner for Gaseous Fuels**
Ø. Spangelo, T. Slungaard, T. Engebretsen, and O. K. Sønju
- 221 **CH₄, H₂S, and SO₂ Oxidation on Pt Catalysts**
V. Dupont, S.-H. Zhang, J. M. Jones, G. Rickett, and M. V. Twigg
- 239 **Challenges in the Transition Toward a Hydrogen-Based Society: an In-Depth Study to Assess the Potential of a Transition to a Hydrogen-Based Energy Supply in Europe**
Ruth Mourik, Arend De Groot, and Harm Jeeninga
- 255 **NO_x Production in Vitiating and Adiabatic Combustion Systems**
Y. Levy and P. Arfi

269 Environmental Evaluation of Sewage Sludge Co-Combustion in a Pilot Fluidized Bed Combustor

M. Helena Lopes, P. Abelha, I. Cabrita, J. F. Santos Oliveira, and I. Gulyurtlu

285 Emissions and Radiation Efficiency for Methane Combustion within a Porous Ceramic Burner

Chengzong Li and Pei-Feng Hsu

Number 4

303 Socioeconomic Aspects of Hydrogen Economy Development

F. Di Mario, A. Iacobazzi, R. Infusino, and A. Mattucci

327 Carbon Burnout of Pulverized Coal in Power Station Furnaces

R. I. Backreedy, L. M. Fletcher, J. M. Jones, L. Ma, M. Pourkashanian, A. Williams, K. Johnson, D. J. Waldron, and P. Stephenson

343 Interactions between NO and Volatile Matter Released by Coal and Petcoke

J. Cances, J.-M. Commandré, and S. Salvador

363 Development of a Thermally Homogeneous Gasifier System Using High-Temperature Agents

A. Ponzio, W. Yang, C. Lucas, and W. Blasiak

381 Challenges in Diesel Reforming: Comparison of Different Reforming Technologies

K. Lucka and H. Köhne

391 Thermal Partial Oxidation of Diesel in Porous Reactors for Synthesis Gas Production

Z. Al-Hamamre, S. Deizinger, A. Mach, F. Von Issendorff, and D. Trimis

409 Table of Contents

413 Author Index
