

COMPUTATIONAL THERMAL SCIENCES

AN INTERNATIONAL JOURNAL

CONTENTS VOLUME 17, 2015

Page Range of Issues

Issue 1: 1-92; Issue 2: 93-189; Issue 3: 191-282; Issue 4: 283-374; Issue 5-6: 375-537

ISSUE 1

| | |
|--|-----------|
| Finite Element Simulation of Nonlinear Magneto-Micropolar Stagnation Point Flow from a Porous Stretching Sheet with Prescribed Skin Friction <i>D. Gupta, L. Kumar, O.A. Bég, & B. Singh</i> | 1 |
| Enhanced Mixed Convection and Heat Transfer by Nanofluid in Ventilated Square Enclosure Including Two Heat Sources <i>H. Moumni & E. Sediki</i> | 15 |
| Analysis of Rotation, Anisotropy, and Relaxation Times on Reflectionwaves in Magneto-Electro-Thermoelastic Half-Space <i>R. Kakar & S. Kakar</i> | 35 |
| Numerical Study of Natural Convection Heat Transfer Performance in an Inclined Cavity with Complex-Wavy-Wall: Nanofluid and Random Temperature <i>H. Salhi, M. Si-Ameur, & D. Haddad</i> | 51 |
| Study of Conservation Applied to Point-Implicit Integration Techniques for Unstructured Finite Volume Navier–Stokes Solvers <i>C. Junqueira-Junior, L. Costa Scalabrin, E. Basso, & J.L.F. Azevedo</i> | 65 |
| Slug Flowheat Transfer in Microchannels: A Numerical Study <i>T. Bandara, S.C.P Cheung, & G. Rosengarten</i> | 81 |

ISSUE 2

SPECIAL ISSUE: INTERNATIONAL CONFERENCE ON HEAT TRANSFER, FLUID MECHANICS, AND THERMODYNAMICS, 2014

GUEST EDITOR: JOSUA P. MEYER

| | |
|---|------------|
| A CFD Investigation of Effects of Flow-Field Geometry on Transient Performance of an Automotive Polymer Electrolyte Membrane Fuel Cell <i>P. Choopanya & Z. Yang</i> | 93 |
| Inverse VoF Meshless Method for Efficient Nondestructive Thermographic Evaluation <i>E. Divo, H. Saad, S. Boetcher, J. Brown, & A. Kassab</i> | 105 |
| Entropy Generation Analysis of the Flow of Two Immiscible Couple Stress Fluids between Two Porous Beds <i>J. Srinivas, J.V.R. Murthy, & K.S. Sai</i> | 123 |
| Assessment of a Lattice Boltzmann Model to Simulate Fluid Flows with Complex Geometries <i>A. Yehya, H. Naji, & L. Zalewski</i> | 139 |
| Laminar and Turbulent Opposing Mixed-Convective Flow over a Vertical Plate with a Uniform Surface Heat Flux <i>P.H. Oosthuizen</i> | 157 |
| Numerical Study and Experimental Validation of the Water Films and the Detachment of Drops on Drift Eliminators <i>J. López, A.S. Kaiser, B. Zamora, M. Lucas, J. Ruiz, & A. Viedma</i> | 167 |
| Lagrangian Block Simulation of Buoyancy at Turbulence Interfaces <i>V.H. Chu & W. Altai</i> | 181 |

ISSUE 3

| | |
|--|------------|
| Application of Gene Expression Programming for Estimating Total Emissivity of H₂O–CO₂ Mixtures in Air-Fuel Combustion without Soot Formation <i>B. Maghbooli, H. Najafi, & M.A. Sobati</i> | 191 |
| Performance Investigation of Air Washer for Different Psychometric Conditions <i>S.S. Chakrabarti & P.K. Das</i> | 217 |
| Finite Differences Analysis on Nonuniform Mesh for Free Convection in a Porous Medium and Comparison with Similarity Approach <i>D. Achemlal & M. Sriti</i> | 231 |
| Magneto-Thermoelastic Rayleigh Waves in a Prestressed Solid Half-Space under Heat Source using Green and Lindsay's Model <i>S. Kakar & R. Kakar</i> | 245 |
| Numerical Investigation of Boundary Condition Effects on Laminar Natural Convection of Power Law Fluids in Square Cross-Sectional Cylindrical Annular Space with Differentially Heated Vertical Walls <i>S. Yigit, J. Ford, R.J. Poole, & N. Chakraborty</i> | 261 |

ISSUE 4

| | |
|---|------------|
| Thermophoresis Effect on the Free Convective Flow in a Differentially Heated Square Cavity <i>S.R. Pop & T. Grosan</i> | 283 |
| Numerical Investigation of Heat Transfer during Solidification in a Rectangular Enclosure with Internally Horizontal Partial Fins <i>L. Khatra, H. El Qarnia, M. El Ganaoui, & El Khadir Lakhal</i> | 293 |
| Radiative Heat Transfer from Supersonic Flow with Suspended Polydisperse Particles to a Blunt Body: Effect of Collisions between Particles <i>D.L. Reviznikov, A.V. Sposobin, & L.A. Dombrovsky</i> | 313 |
| Coupled Heat and Mass Transfer with One Sublimation Moving Interface and Freezing Zone <i>S.K. Singh, T.N. Mishra, & K.N. Rai</i> | 327 |
| On Ultimate Regime of Rayleigh-Benard Convection <i>I. Palymskiy</i> | 339 |
| A Simulation of Compressible Boundary-Layer Flow with Heat Transfer and Pressure Gradient <i>M.R. Mohaghegh</i> | 345 |
| High-Order Spherical Harmonics Method for Radiative Transfer in Spherically Symmetric Problems <i>G.L. Ymeli & H.T.T. Kamdem</i> | 353 |
| Book Review of Text Book: Thermal Energy Systems, Design and Analysis <i>B.E. Milton</i> | 373 |

ISSUES 5-6

**SPECIAL ISSUE: 6th INTERNATIONAL SYMPOSIUM ON ADVANCES
IN COMPUTATIONAL HEAT TRANSFER (CHT-15)**
GUEST EDITORS: YOGESH JALURIA AND ZHIXIONG GUO

| | |
|---|------------|
| Numerical Study on Flow and Convective Heat Transfer of Aviation Kerosene in a Vertical Minitube at Supercritical Pressures <i>D. Huang, Z. Wu, & B. Sundén</i> | 375 |
| Heat Transfer in Natural Convection with Finite-Sized Particles Considering Thermal Conductance Due to Inter-Particle Contacts <i>S. Takeuchi, T. Tsutsumi, K. Kondo, T. Harada, & T. Kajishima</i> | 385 |

| | |
|---|------------|
| Thermal Stratification on Natural Convection over an Inclined Wavy Surface in a Nanofluid Saturated Porous Medium <i>D. Srinivasacharya & P.V. Kumar</i> | 405 |
| Bifurcation of Natural Convection Flow in an Inclined Differentially Heated Closed Square Cavity <i>N. Williamson, S.W. Armfield, M.P. Kirkpatrick, & W. Lin</i> | 417 |
| Simulating Phase Change Heat Transfer using COMSOL and FLUENT: Effect of the mushy-Zone Constant <i>A.C. Kheirabadi & D. Groulx</i> | 427 |
| Validation of a Multifield Approach for the Simulations of Two-Phase Flows <i>S. Fleau, S. Mimouni, N. Mérigoux, & S. Vincent</i> | 441 |
| A Modeling Study to Analyze Thermal and Mechanical Effects of Pulsed Laser Irradiation on Tissues <i>M. Ganguly & K. Mitra</i> | 459 |
| Numerical Study of Heat Transfer Enhancement by Deformable Twin Plates in Laminar Heated Channel Flow <i>R.U. Joshi, A.K. Soti, & R. Bhardwaj</i> | 467 |
| Transient Analysis of Heat Transfer in Parallel Squared Channels for High Temperature Thermal Storage <i>A. Andreozzi, B. Buonomo, O. Manca, & S. Tamburrino</i> | 477 |
| Effects of Flame Structure on Entrainment Characteristics of a Fire Plume <i>H. Suto & Y. Hattori</i> | 491 |
| Benchtop Microreactor Built for Diagnostic Deposition of Cu₃BiS₃ for Use in Photovoltaic Devices <i>J.A. Epstein, R.J. Castellano, J.W. Shan, & D.P. Birnie III</i> | 501 |
| 2D Particle Mechanics Simulations on Evolution and Interactions of Heat Chains and Force Networks Under Steady-State Conditions <i>G. Küçük, M. Gonzalez, & A.M. Cuitiño</i> | 515 |
| Heat Transfer in Jacketed Vessel Equipped with Down-Pumping Pitched Blade Turbine <i>A. Chandra & H. Singh</i> | 527 |
