

SUBJECT INDEX - VOLUME 9

Critical Reviews™ in Eukaryotic Gene Expression

Page Numbers for Issues:

Issue 1, 1–88; **Issue 2**, 89–173; **Issues 3&4**, 175–381

- Acetyltransferase complexes, 231
Adipogenesis, 159
Alkylating agents, 337
Alternative splicing, 45
Ameloblasts, 45
Amelogenin, 45
Anticancer agents, 337
Antimetabolites, 337
Assembly, 373

Blocked 5' end structure ($m_3^{1,2,7}$ GpppN, m^7 GpppN, and mpppN), U1, U2, etc., 107
Blood coagulation, 59
Bone formation, 1

Calcium binding, 59
Cancer, 33
Cell-free assays, 373
Chondrogenic, 1
Chromatin, 183, 203, 285
Chromatin remodeling, 221, 295
Chromatin structure, 175, 267, 345
Chromosome domains, 353
Chromatosome, 245
Cleavage, 213
Commitment, 159
Condensed chromatin fiber, 245
Core particle, 245
CREB, 19

Differentiation, 1
Development, 19, 159, 353
Disassembly, 373
DNA ligase I, 345
DNA loops, 279
DNA methylation, 175, 295
DNA methyltransferase, 345
DNA replication factories, 363
Drosophila, 267

EGF-like domains, 59
Extended chromatin fiber, 245

Fibrosis, 33
FISH, 191
Functional organization of the nucleus, 345

 γ -carboxyglutamic acid, 59
Gene expression, 183, 353
Gene rearrangement, 295
Genome evolution, 279
Growth stimuli, 329

Heat shock, 363
Histone, 231
Histone acetylation, 175, 295
Histone modification, 221
HMG1, 245
HnRNP proteins, 311

Illegitimate recombination, 279
Immunoglobulin and T-cell receptor genes, 295
Intranuclear trafficking, 183
Ionizing radiation, 337

Karyopherins, 89

Lamin B receptor, 257
Lamina-associated polypeptide, 257
Lamina-associated proteins, 285
Latency, 33
Latent TGF β binding protein, 33
Linker histone, 245
Living cell microscopy, 191

Marrow stromal cells, 159
Microtubules, 373
Mineralization, 1
Mitogenic pathways, 19
Mitosis, 267
mRNA surveillance, 213
mRNA transport, 213
Multiarm oligomer, 319

Nuclear assembly, 257, 285
Nuclear envelope, 285, 373
Nuclear export signal (NES), 89
Nuclear kinase, 267
Nuclear lamina, 257
Nuclear lamins, 285
Nuclear localization signal (NLS), 89
Nuclear matrix, 183, 279, 295, 319, 329, 363
Nuclear pore complex (NPC), 89

- Nuclear small RNA, cap, 107
Nucleolar small RNA, snRNA, 107
Nucleoporins, 89
Nucleoskeleton, 267
Nucleosome, 329
Nucleus, 203, 353
- Osteogenic, 1
Osteogenesis, 159
Osteoporosis, 33
- PCNA, 345
Pluripotent, 1
Polyadenylation, 213
Protein complexes, 175
Protein kinase CK2, 329
- Ran GTPase, 89
Replication origins, 353
Replication timing, 353
RNA processing, 191
RNA transport, 191
- SAGA, 221
SAR, 295
Satellite DNA, 311
Scaffold, 311
- Self-assembly, 319
Signaling, 329
Sites of transcription and RNA processing, 311
Somatic hypermutation, 295
snoRNA, 107
snRNA, 107
Splicing, 213
Stem cells, 159
Superrepression, 175
SWI/SNF, 221
- Targeting sequence, 345
TGF β receptors, 33
Tooth enamel, 45
Topoisomerase I, 337
Topoisomerase II, 279, 337
Transcription, 19, 45, 191, 203, 231, 295, 329
Transcriptional repression, 311
Transcriptional termination, 213
Transforming growth factor, 33
- Uridylic acid-rich RNA1, RNA2, etc., 107
- Viral oncoproteins, 19
Vitamin K, 59
- X-Y chromosomal genes, 45
